

Pomfret: Condition 'Red'

Pomfret has been elevated to the **'Red' Status** by the State due to the increase in Covid-19 positive cases (15.3 cases per 100,000.) in the past two weeks. This is not due to any specific increase just the rise in general. We have had a total of 43 confirmed cases.

Covid fatigue is setting in just as we are back to indoor activities and heading into family gatherings for Thanksgiving, Christmas, and New Year's Eve. Add to that flu season. It is extremely important to continue to protect ourselves and our families and neighbors.

The **Wash hands, Wear masks, and Wave from 6'** recipe works, it's easy, and we need to promote and practice it. Please do what you can to encourage everyone you know to stay vigilant, be careful, and to not take chances. Stay home.

Be Safe, not sorry.

Don't invite Covid-19 to Thanksgiving.

The autumn surge of COVID-19 cases has reached red-alert status in 145 of Connecticut's 169 cities and towns, with hospitalizations for the disease statewide more than doubling in the past two weeks.
